

ANIRUDH A ZALKI

AI/ML Engineer | Full-Stack Developer | Cloud | Agentic AI

Vijayapura, Karnataka, India | +91-7892217239 | anirudhzalki429@gmail.com | linkedin.com/in/anirudh-zalki-315a9a292 | github.com/AnirudhZalki

SUMMARY

AI/ML Engineer with hands-on experience in Agentic AI, RAG pipelines, Edge AI inference, and cloud deployment. Skilled at full-stack development using MERN and Django, and shipping intelligent systems end-to-end. Seeking to contribute to AI/ML teams building scalable, real-world products.

SKILLS

AI / ML: Python, PyTorch

Agentic AI & RAG: LangChain, FAISS, Chroma, Gemini

Edge AI: ONNX Runtime, TFLite (Android Deployment), Quantization

Cloud: Docker, AWS EC2, S3, Nginx

Full-Stack Web Development: MERN Stack, Django, MongoDB, REST APIs

Tools & Languages: Figma, Git, C, C++, Java (Beginner)

EXPERIENCE

Tech Lead - KLE Tech IUCEE Student Chapter

Sep 2025 – Jun 2026

- Designed and developed the chapter's official website with a scalable backend architecture.
- Mentored junior developers on AI/ML fundamentals, REST APIs, and deployment practices.

Project Lead & Researcher - ZynoxGenI (AI Web Development Project)

Jul 2025 – Feb 2026

- Led research and development of AI-powered web solutions; coordinated product planning, sprint delivery, and cross-functional team execution.
- Drove end-to-end AI feature integration across client projects, from requirement analysis and prototyping through deployment and performance evaluation.

UI/UX Designer - KLE Tech IUCEE Student Chapter

Sep 2024 – June 2025

- Designed posters, UI mockups, and digital content that elevated the chapter's brand presence.

PROJECTS

RBAC-RAG System

LangChain, FAISS, FastAPI, JWT

- Built a production-grade RAG pipeline with role-based access control (Admin/Analyst/Viewer) enforced at the vector retrieval stage using FAISS and JWT auth.
- Reduced hallucinations by ~40% via structured retrieval, chunking, embedding, and metadata-filtered ingestion; exposed as a secure FastAPI microservice.

Agentic AI System - CRISIS MIND AI - HackFusion 2.0 (3rd Place)

LangGraph, CrewAI, Tool-Use, Multi-Agent AI

- Built a multi-agent disaster-response platform coordinating medical, rescue, transport, and shelter operations with AI-driven route planning and real-time decision support.
- Cut decision-making time by generating AI-assisted recommendations and simulating optimized resource allocation across agents.

SignoVoice - AI Accessibility Platform

Researcher & Project Lead

TensorFlow, MediaPipe, NLP

- Researched and developed a real-time sign language recognition and voice-to-sign translation system for accessibility, leveraging MediaPipe hand-tracking with sub-20ms inference latency and achieving 94%+ gesture classification accuracy using a custom TensorFlow model.
- Led end-to-end project execution: defined research objectives, coordinated NLP and computer vision modules, and deployed the system as a cross-platform accessibility tool serving users with hearing and speech impairments.

EDUCATION

B.E. - Computer Science & Artificial Intelligence

KLE Technological University, Hubballi | CGPA: 7.67 / 10.00

PUC – Excellent PU Science College, Vijayapura

77.33%

CERTIFICATIONS & AWARDS

- AWS Cloud Quest: Cloud Practitioner - Amazon Web Services
- HackerRank CSS Intermediate Certificate - HackerRank
- 3rd Place, HackFusion 2.0 (AGMR College) - built an Agentic AI system in 24 hours
- Walmart- Advanced Software Engineering JobSimulation Certificate
- Top 15 Teams (from college), Smart India Hackathon (SIH) 2025
