

ANIRUDH A ZALKI

AI/ML Engineer | Full-Stack Developer | Cloud & DevOps | Agentic AI
Vijayapura, Karnataka, India | +91-7892217239 | anirudhzalki429@gmail.com | [linkedin.com/in/anirudh-zalki-315a9a292](https://www.linkedin.com/in/anirudh-zalki-315a9a292)

SUMMARY

AI/ML Engineer with hands-on experience across Agentic AI, RAG pipelines, Edge AI inference, and cloud-native observability (Docker, Prometheus, Grafana). Skilled at full-stack development and shipping intelligent systems end-to-end. Seeking to contribute to AI/ML teams building scalable, real-world products.

SKILLS

AI / ML: Python, TensorFlow, PyTorch, Scikit-learn, Hugging Face
Agentic AI & RAG: LangGraph, LangChain, CrewAI, Multi-Agent Orchestration, FAISS, Chroma, Gemini API
Edge AI: ONNX Runtime, TFLite, Quantization, ARM/x86 Inference
Cloud / DevOps: Docker, AWS EC2, S3 bucket, Grafana, Prometheus, Nginx
Full-Stack: MERN Stack, Django, REST APIs, MongoDB, JWT Auth
Tools & Languages: Git, GitHub, Flutter (learning), C, C++, Java(intermediate)

EXPERIENCE

- Tech Lead - KLE Tech IUCEE Student Chapter** *Sep 2025 – Jun 2026*
- Designed and developed the chapter's official website with a scalable backend architecture.
 - Represented the chapter at IASF 2026, Bengaluru, presenting the CivicLens civic-tech platform.
 - Mentored junior developers on AI/ML fundamentals, REST APIs, and deployment practices.
- Founder - ZynoxGenI (Startup Initiative)** *Jul 2025 – Feb 2026*
- Founded an AI-powered web development startup; managed product planning and team delivery.
 - Coordinated AI feature integration across client projects from ideation through deployment.
- UI/UX Designer - KLE Tech IUCEE Student Chapter** *2023 – 2024*
- Designed posters, UI mockups, and digital content that elevated the chapter's brand presence.

PROJECTS

RBAC-RAG System

LangChain, FAISS, FastAPI, JWT

- Built a production-grade RAG pipeline with role-based access control (Admin/Analyst/Viewer) enforced at the vector retrieval stage using FAISS and JWT auth.
- Reduced hallucinations by ~40% via structured retrieval, chunking, embedding, and metadata-filtered ingestion; exposed as a secure FastAPI microservice.

Agentic AI System - CRISIS MIND AI - HackFusion 2.0 (3rd Place)

LangGraph, CrewAI, Tool-Use, Multi-Agent AI

- Built a multi-agent disaster-response platform coordinating medical, rescue, transport, and shelter operations with AI-driven route planning and real-time decision support.
- Cut decision-making time by generating AI-assisted recommendations and simulating optimized resource allocation across agents.

SignoVoice - AI Accessibility Platform

TensorFlow, MediaPipe, NLP

- Built real-time sign language recognition and voice-to-sign translation for the deaf and mute community, using MediaPipe hand-tracking for sub-20ms inference.

EDUCATION

B.E. - Computer Science & Artificial Intelligence

KLE Technological University, Hubballi | CGPA: 7.78 / 10.00

CERTIFICATIONS & AWARDS

- AWS Cloud Quest: Cloud Practitioner - Amazon Web Services
- HackerRank CSS Intermediate Certificate - HackerRank
- 3rd Place, HackFusion 2.0 (AGMR College) - built an Agentic AI system in 24 hours
- Top 15 Teams (College), Smart India Hackathon (SIH) 2025
